

# Monitor your UPS system from the palm of your hand

Don't let an unreliable power supply disrupt your lifestyle.

**UPS systems can fail early without the backup time you were promised**

A lack of information about UPS performance leaves your home-life disrupted as problems go by undetected.

Increase UPS life by up to **40%**

**Choose eenee.io to avoid distribution and save money:**

- ✔ Reduce costs by increasing the life of your UPS
- ✔ Ensure continuous power through improved reliability
- ✔ Get early alerts before issues become failures

# Maximise your UPS system efficiency with enee.io

Monitor your UPS's performance enabling you to maintain reliable power while lowering costly repairs and replacement. With our early warning alerts sent straight to your phone, you can keep your household running 24/7 without any interruptions.

## How it works

Smart sensors collect information to give you complete visibility on UPS performance.

## Help increase the life of your system

On average, batteries in energy systems fail 1.5 years sooner than intended. With preventative alerts, you can take action before costly problems arise.

## The cost-effective solution to reliable power

enee.io combines the latest sensor technology with easy-to-read mobile analytics. Get set up in minutes to start maximizing your home energy system's efficiency.

## Say goodbye to power outages and hello to hassle-free living with [enee.io](https://enee.io)

### enee.io is the fitness tracker for energy systems

enee.io increases access to reliable and affordable energy by improving the life and efficiency of energy systems. Through plug-and-play sensors, mobile phone applications and web-based reporting, enee.io provides customers with the information they need to optimize energy usage, improve energy system health and safeguard backup power supplies.
